[Portfolio](#)

PROFILE

Computer Engineering student and full-stack developer focused on building production-grade web platforms and software engineering tools. Experienced across React/Next.js frontends and Node.js/Express backends, with hands-on work integrating LLM APIs (Gemini) into real applications and a strong foundation in databases, REST APIs, and system design.

EDUCATION

Visvesvaraya Technological University (VTU), India

2023 – 2026

Bachelor of Engineering in Computer Engineering

CGPA: 8.5 / 10.0 (through 7th semester)

- **Senior Secondary (12th Grade)** – Physics, Chemistry, Mathematics — 82% (2022)
- **Secondary (10th Grade)** – General Academics — 95% (2020)

TECHNICAL SKILLS

- **Languages:** Python, C, C++, Java, TypeScript, JavaScript, SQL
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, WebSockets, JWT
- **Databases:** PostgreSQL, MySQL
- **AI / ML:** Gemini API, OpenCV, Prompt Engineering, Agentic Workflows
- **Tools:** Git, GitHub, Docker, Linux/WSL, VS Code, Cursor

PROJECTS

ReForge – AI Software Re-Engineering Platform

[GitHub ↗](#)

AI-assisted platform for deep code analysis, refactoring, and architectural planning.

- Built automated refactoring pipelines that parse complex codebases and generate restructuring recommendations.
- Architected interactive AI planning modules to accelerate technical prototyping and software design.

Group-Chatbot – Real-Time AI Chat Platform

[GitHub ↗](#)

Full-stack group chat platform where tagging @AI anywhere in a conversation answers questions, gives suggestions, or analyzes the chat.

- Built inline @AI tagging so any user can ask questions or get suggestions using live conversation context, in 1:1 or group chats.
- Designed group rooms supporting 20+ members via shareable joining links or codes, with real-time messaging over sockets.

EDU-SHARE – Knowledge Exchange Platform

[GitHub ↗](#)

Collaborative academic resource-sharing platform organized by institution, course, and subject.

- Built structured taxonomy indexing enabling cross-university peer discovery of study materials.
- Built end-to-end document workflows supporting organized paper, note, and syllabus distribution.

Envoy – AI Career Agent

[GitHub ↗](#)

Open-source agentic tool that tailors a resume/CV or portfolio to a target role.

- Built AI-assisted workflows that parse a resume/bio and generate an ATS-ready resume, academic CV, or deployable portfolio.

CartIQ – AI Shopping Assistant

[GitHub ↗](#)

Full-stack shopping assistant built with Next.js 16 and Supabase for smart product comparison.

- Engineered price-tracking and comparison logic using the Gemini API for automated purchase insights.

Hotel Management System – Java Desktop Application

[GitHub ↗](#)

- Java Swing application integrated with MySQL for centralized hotel operations and record management.

ACHIEVEMENTS & CERTIFICATIONS

- **NPTEL Certification in Machine Learning:** Coursework in supervised/unsupervised learning and neural networks.
- **Competitive Programming:** Active CodeWars participant focused on algorithmic efficiency.
- **Hackathons & Rapid Prototyping:** Built and pitched full-stack and AI prototypes across national hackathons.
- **Open Source:** Maintain public GitHub repositories for knowledge platforms and re-engineering tools.

SOFT SKILLS

Communication · Teamwork · Leadership · Problem Solving · Adaptability
